COMPANY OVERVIEW, NATURE OF OPERATIONS, AND OVERALL PERFORMANCE

The Company was incorporated on February 18, 2010, pursuant to the *Business Corporations Act* (British Columbia) as a wholly owned subsidiary of Golden Valley Mines Ltd. (“**Golden Valley**”), a Canadian public corporation with an office located in Val-d’Or, Québec, Canada, involved, together with its various subsidiaries, in initial grassroots exploration projects.

In 2011, as part of a plan of arrangement (the “**Arrangement**”), Golden Valley transferred certain of its properties and carried interests in certain properties to the Company along with a \$600,000 cash infusion against the issuance of 9,892,722 common shares and subsequently, distributed to its shareholders, by way of a dividend, a part of its holding in the Company’s capital stock. As a result of the Arrangement, Nunavik Nickel became a reporting issuer in Alberta, British Columbia, Ontario and Québec. Nunavik Nickel is considered a “venture issuer” as such term is defined by applicable securities legislation. Since July 15, 2011 (the “**Trading Date**”) the Company’s common shares trade on the TSX Venture Exchange (the “**Exchange**”) under the symbol KZZ.

The business objectives of the Company are to hold title to and to promote and develop certain advanced projects.

must keep the property in good standing. The Company received Exchange approval on April 7, 2015.

Other Properties

The Company's management still believes in the potential of the following properties and intends to renew the claims, however the difficulty in raising financing to carry out exploration work has led the Company to adopt a prudent approach with respect to incurring any significant expenses and, consequently, to impair the book value of these properties as of December 31, 2013.

Fortin Property

The Fortin Property is located in the central part of Ducros Township, approximately 80 kilometers northeast of the Town of Val-d'Or, Québec, and consists of five contiguous mining claims. The Company does not enter into financial instrument agreements including derivative financial instruments for speculative purposes. The Company's main financial risk exposure and its financial risk management policies are the following:

Credit risk

Credit risk relates to the risk that one party to a financial instrument will not fulfill some or all of its obligations, thereby causing the Company to sustain a financial loss. The main risk related to credit risk is through cash which is managed by dealing with one reputable financial institution.

Liquidity risk

Liquidity risk management serves to maintain a sufficient amount of cash and cash equivalents and to ensure that the Company has financing sources such as bank loans for a sufficient authorized amount. The Company establishes budget and cash estimates to ensure it has the necessary funds to fulfill its obligations. Accounts payable and accrued liabilities are due within less than 90 days.

CRITICAL RISKS INHERENT TO THE COMPANY'S BUSINESS

- **Investment of Speculative Nature**

Investing in the Company, at this early stage of its development, is of a highly speculative nature.

- **Nature of Mineral Exploration and Mining**

There is no known mineral resource on the Company's properties. Mineral exploration and development involves a high degree of risk, requires substantial expenditures and few properties that are explored are ultimately developed into producing mines.

- **Exploration and Development Risks**

Resource exploration and development is a speculative business, involving considerable financial and technical risks, including the failure to discover mineral deposits, market fluctuations and government regulations, which are beyond the control of the Company.

- **Additional Financing**

Future exploration and development activities will require additional equity and debt financing. Failure to obtain such additional financing could result in delay or indefinite postponement of exploration and development of the property interests of the Company.

- **Stress in the Global Economy and Financial Condition**

The adverse effects on the capital markets generally make the raising of capital by equity or debt financing much more difficult and the Company is dependent upon the capital markets to raise financing.

- **Permits and Licenses**

There can be no assurances that the Company will be able to obtain all necessary licenses and permits required to carry out exploration, development and mining operations for its proposed projects.

- **Competition**

The mineral exploration and mining business is competitive in all of its phases. There is no assurance that the Company will be able to compete successfully with the competition in acquiring suitable properties or prospects for mineral exploration.

- **No Assurance of Title to Property**

The Company's claims may be subject to prior unregistered agreements or transfers or third party and native land claims and title may be affected by undetected defects.

- **Dependence on Key Individuals**

The Company is dependent on a relatively small number of key personnel, the loss of any one of whom could have an adverse effect on the Company.

- **Environmental Risks for Current and Past Activities and other Regulatory Requirements**

The Company may be liable for environmental contamination and natural resource damages relating to properties that it currently owns, operates or have an interest in, or at which environmental contamination occurred while or before it owned, operated or acquired an interest in the properties. No assurance can be given that potential liabilities for such contamination or damages caused by past activities at these properties do not exist.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company.

- **Political Regulatory Risks**

Any changes in government policy may result in changes to laws affecting the Company's ability to undertake exploration and development activities in respect of present and future properties.

- **Conflicts of Interest**

The directors and officers of the Company are also directors and officers of other companies, some of which are in the same business as the Company. This situation may result in conflicting legal obligations which may expose the Company to liability to others and impair its ability to achieve its business objectives.

- **Insurance**

The Company will remain at risk and will be potentially subject to liability for hazards associated with mineral exploration which it cannot insure against or which it has elected not to insure against because of premium costs or other reasons.

- **Influence of Third Party Stakeholders**

Claims by third parties on the lands in which the Company hold interests, or the exploration equipment and road or other means of access which the Company intend to utilize in carrying out work programs or general exploration mandates, even if not meritorious, may create delays resulting in significant financial loss and loss of opportunity for the Company.

- **Fluctuation in Market Value of Shares**

The market price of a publicly-traded stock is affected by many variables not directly related to the corporate performance of the entity. The future effect of these and other factors on the market price of Company's shares on the Exchange cannot be predicted.
