VAL-D'OR MINING CORPORATION

Notes to Condensed Interim Financial Statements

As at and for the three and six months ended June 30, 2023

(Expressed in Canadian dollars unless otherwise noted)

1) STATUTES OF INCORPORATION AND NATURE OF ACTIVITIES

Val-d'Or Mining Corporation (the "Company"), incorporated on February 18, 2010 under the Business Corporations Act of British Columbia is involved in the process of exploring, evaluating and promoting its mineral properties and other projects.

The head office of the Company is located at 152 Chemin de la Mine École, Val-d'Or, Québec, J9P 7B6. The Company's registered and records office is located at #530 - 355 Burrard Street, Vancouver, B.C. V6C 2G8. The Company also has exploration offices located at 2864 Chemin Sullivan, Val-d'Or, Québec, J9P 0B9.

The Company's shares trades on the TSX Venture Exchange ("TSX-V") under its trading symbol "VZZ".

As at June 30, 2023, Gold Royalty Corp. ("GROY" or Gold Royalty") is the Company's largest shareholder, holding indirectly through its subsidiary Golden Valley Abitibi Royalties Ltd. ("Abitibi") 35.09% (December 31, 2022 – 35.59%) of the issued and outstanding shares. Golden Valley Mines and Royalties Ltd. ("Golden Valley") amalgamated with Abitibi Royalties Inc. (another subsidiary of Gold Royalty) as one company under the name Golden Valley Abitibi Royalties Ltd ("Abitibi") on February 7, 2023.

2) BASIS OF PRESENTATION AND GOING CONCERN

These condensed interim financial statements, approved by the Board of Directors on August 25, 2023, have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including IAS 34, "Interim Financial Reporting". These condensed interim financial statements as well as the related notes should be read in conjunction with the annual audited financial statements of the Company for the year ended December 31, 2022.

The Company's ability to continue as a going concern depends upon its ability to obtain necessary financing to fund its prospection operations, its projects and continued support of suppliers and creditors. The Company's ability to raise enough financing to meet these objectives cannot be determined at this time. The Company's business involves a high degree of risk and there is no assurance that the Company will be successful in discovering economically recoverable deposits on its mineral properties. Furthermore, the Company has accumulated deficit and has not yet generated significant income or cash flows from its operations and there is no assurance that the business will be profitable in the future.

These material uncertainties may cast significant doubt regarding the Company's ability to continue as a going concern. The carrying amounts of assets, liabilities and expenses presented in the financial statements and the classification used in the financial statements have not been adjusted as would be required if the going concern assumption was not appropriate. Those adjustments could be material.

3) ADOPTION OF NEW ACCOUNTING STANDARDS

At the date of authorization of these financial statements, certain new standards, amendments and interpretations to existing standards have been published but are not yet effective and have not been adopted early by the Company. Management anticipates that all of the pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of each pronouncement. Information on new standards, amendments and interpretations relevant to the Company's financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have a material impact on the Company's financial statements.

A number of amendments to standards were effective for annual periods beginning on or after January 1, 2023, including amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting policies, Changes in accounting estimates and errors. There was no material impact on the Company's financial statements from the adoption of these amendments.

4) JUDGMENTS, ESTIMATES AND ASSUMPTIONS

When preparing financial statements, management undertakes a number of estimates, judgments and assumptions about recognition and measurement of assets, liabilities, income and expenses. These estimates and judgments are continuously evaluated and are based on management's experience and knowledge of the relevant facts and circumstances. Actual results may differ from the amounts included in the financial statements.

Significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty are the same as those that applied to the annual audited consolidated financial statements as at and for the year ended December 31, 2022.

In the event that the purchaser has not entered into such a transaction within the specified time period, the properties will revert back to the Company and the Company will return to the purchaser 50% of the consideration received under the purchase agreement.

On December 15, 2022, in light of Progenitor Metals not being able to complete a “going public transaction”, the Company and Golden Valley entered into a new mineral claim sale and purchase agreement with Progenitor Metals whereby the 5,345,657 shares in the capital of Progenitor Metals (of which 4,276,526 shares were held by the Company) were surrendered to Progenitor Metals; and in return, seven of the ten exploration properties were reverted back to the Company, with the remaining three properties being sold to Progenitor Metals for consideration of a promissory note of \$210,000 (of which \$168,000 will be payable to the Company and \$42,000 will be payable to Golden Valley), grant a 1.5% NSR royalty to the Company (and a 1.25% NSR royalty to Golden Valley) and \$15,000 annually to the Company commencing on December 15, 2026. Consequently, the Company recognized a gain on investments of \$71,937 on the surrender of the 4,276,526 shares to Progenitor Metals in return for the ten properties being reverted back to the Company. On sale of the three properties, the Company recognized a gain on sale of \$117,966 on proceeds of the promissory note of \$168,000 and fair value of \$1,932 on the 1.5% NSR royalty interest.

The promissory note of \$168,000 to the Company is due on demand without interest, repayable in whole or in part; and if and when Progenitor Metals completes a “going public” transaction, the promissory note can be satisfied by the issuance of shares of Progenitor Metals at the option of the Company. As at December 31, 2022, the Company recognized an allowance of \$168,000 for credit losses on the promissory note and an impairment of \$1,932 on 1.5% NSR royalty interest.

19) FINANCIAL ASSETS AND LIABILITIES

Categories of financial assets and liabilities

Financial assets and liabilities measured at amortized cost for which a fair value is provided in the statement of financial position are presented in accordance with the fair value hierarchy.

This hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3: inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement. There have been no significant transfers between Levels 1, 2 and 3 in the reporting periods. The techniques and evaluation methods used to measure fair value were not changed compared to previous years. The carrying amounts and fair values of financial instruments presented in the statement of financial position are as follows:

Categories of financial assets and liabilities

The carrying value of cash and cash equivalents, accounts receivable, due from/to related parties, loan, sales taxes payable, accounts payable and accrued liabilities is considered to be a reasonable approximation of fair value because of the short-term maturity of these instruments. As at June 30, 2023, the Company classified cash and cash equivalents and short-term investments as Level 1; and, accounts receivable and amounts due from/to related parties and other payables as Level 3.

The Company's long-term investments, consisting of investments in the common shares of private companies, do not have a quoted market price in an active market and the Company has assessed a fair value of the investment based on their unobservable net assets. As a result, the fair value is classified within Level 3 of the fair value hierarchy. The process of estimating the fair value of these investments is based on inherent measurement uncertainties and is based on techniques and assumptions that emphasize both qualitative and quantitative information. There is no reasonable quantitative basis to estimate the potential effect of changing the assumptions to reasonably possible alternative assumptions on the estimated fair value of these long-term investments.

20) CAPITAL MANAGEMENT POLICIES AND PROCEDURES

The Company's objectives in managing capital are to safeguard its ability to continue its operations, to increase the value of the assets of the business and to provide an adequate return to owners. These objectives will be achieved by identifying the right exploration prospects, adding value to these projects and ultimately taking them through to production either with partners or by the Company's own means or sale. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares to improve its financial performance and flexibility. When financing conditions are not optimal, the Company may enter into option agreements or other solutions to continue its exploration and evaluation activities or may slow its activities until conditions improve.

The Company monitors capital on the basis of the carrying amount of equity. Capital for reporting period under review is summarized in note 12 and in the statements of changes in equity. The Company is not subject to any externally imposed capital requirements.

21) FINANCIAL RISKS

The Company is exposed to various financial risks in relation to its financial instruments. The main types of risks the Company is exposed to are credit risk, market risk and liquidity risk. The Company focuses on actively securing short to medium-term cash flow by minimizing the exposure to financial markets. The Company does not actively engage in the trading of financial instruments for speculative purposes. The Company's main financial risk exposure and its financial risk management policies are as follows:

Credit risk

Credit risk relates to the risk that one party to a financial instrument will not fulfill some or all of its obligations, thereby causing the Company to sustain a financial loss. The Company's maximum exposure to credit risk is limited to the carrying amount of cash and cash equivalents of \$1,282,636 at June 30, 2023 (December 31, 2022 - \$1,206,672), accounts receivable of \$17,247 (December 31, 2022 - \$273,768) and due from related parties of \$3,449 (December 31, 2022 - \$13,797). The risk related to cash is considered negligible as the Company is dealing with a reputable financial institution whose credit rating is excellent. The risk related to amounts due from related parties is mitigated by having common management. No risk related to accounts receivable as amounts have been received subsequent to year-end.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The Company is exposed to fluctuations in the market prices of its investments in private and public companies. The fair value of those instruments represents the maximum exposure to price risk.
