1) STATUTES OF INCORPORATION AND NATURE OF ACTIVITIES

Val-d'Or Mining Corporation (the "Company"), incorporated on February 18, 2010 under the Business Corporations Act of British Columbia is involved in the process of exploring, evaluating and promoting its mineral properties and other projects.

The head office of the Company is located at 152 Chemin de la Mine École, Val-d'Or, Québec, J9P 7B6. The Company's registered and records office is located at #530 - 355 Burrard Street, Vancouver, B.C. V6C 2G8. The Company also has exploration offices located at 2772 Chemin Sullivan, Val-d'Or, Québec, J9P 0B9.

The Company's shares trades on the TSX Venture Exchange ("TSX-V") under its trading symbol "VZZ".

As at March 31, 2024, Gold Royalty Corp. ("Gold Royalty") is the Company's largest shareholder, holding indirectly through its subsidiary Golden Valley Abitibi Royalties Ltd. ("Abitibi") 34.17% (December 31, 2023 – 34.17%) of the issued and outstanding shares. Golden Valley Mines and Royalties Ltd. ("Golden Valley") amalgamated with Abitibi Royalties Inc. (another subsidiary of Gold Royalty) as one company under the name Golden Valley Abitibi Royalties Ltd ("Abitibi") on February 7, 2023.

2) BASIS OF PRESENTATION AND GOING CONCERN

These condensed interim financial statements, approved by the Board of Directors on May 24, 2024, have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including IAS 34, "Interim Financial Reporting". These condensed interim financial statements as well as the related notes should be read in conjunction with the annual audited financial statements of the Company for the year ended December 31, 2023.

The Company's ability to continue as a going concern depends upon its ability to obtain necessary financing to fund its prospection operations, its projects and continued support of suppliers and creditors. The Company's ability to raise enough financing to meet these objectives cannot be determined at this time. The Company's business involves a high degree of risk and there is no assurance that the Company will be successful in discovering economically recoverable deposits on its mineral properties. Furthermore, the Company has accumulated deficit and has not yet generated significant income or cash flows from its operations and there is no assurance that the business will be profitable in the future.

These material uncertainties cast significant doubt regarding the Company's ability to continue as a going concern. The carrying amounts of assets, liabilities and expenses presented in the financial statements and the classification used in the financial statements have not been adjusted as would be required if the going concern assumption was not appropriate. Those adjustments could be material.

3) NEW AND FUTURE ACCOUNTING POLICIES

At the date of authorization of these condensed interim financial statements, certain new standards, amendments and interpretations to existing standards have been published but are not yet effective and have not been adopted early by the Company. Management anticipates that all of the pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of each pronouncement. Information on new standards, amendments and interpretations relevant to the Company's financial statements is provided below and are being evaluated to determined their impact on the financial statements. Certain other new standards and interpretations have been issued but are not expected to have a material impact on the Company's financial statements.

Classification of Liabilities as Current or Non-current (Amendments to IAS 1)

IAS 1 – Presentation of Financial Statements ("IAS 1") was amended in January 2020 to provide a more general approach to the classification of liabilities under IAS 1 based on the contractual arrangements in place at the reporting date. The amendments clarify that the classification of liabilities as current or noncurrent is based solely on a company's right to defer settlement at the reporting date. The right needs to be unconditional and must have substance. The amendments also clarify that the transfer of a company's own equity instruments is regarded as settlement of a liability, unless it results from the exercise of a conversion option meeting the definition of an equity instrument. The amendments are effective for annual periods beginning on January 1, 2024. There was no material impact on the Company's condensed interim financial statements from the adoption of these amendments.

4) SIGNIFICANT ACCOUNTING POLICIES

Change in Accounting Policy and Restatement

Change in accounting policy

In fiscal year 2023, in order to enhance the relevance to the decision-making needs of users and improve comparability with its peers, the Company voluntarily elected to change its accounting policy with respect to exploration properties and deferred exploration expenditures, as well on acquired royalty interests consistent with the guidance provided in IFRS 6 – Exploration for and Evaluation of Mineral Resources and IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors. The new accounting policy was adopted on December 31, 2023 and applied retroactively to the financial statements for the year ended December 31, 2022 and the statement of financial position as at December 31, 2022 and January 1, 2022.

(Expressed in Canadian dollars unless otherwise noted)

4) SIGNIFICANT ACCOUNTING POLICIES (continued)

Change in Accounting Policy and Restatement (continued)

Change in private investments

In fiscal year 2023, the Company also changed the method used to estimate the fair value of its private company investments. Under the updated approach, the Company estimated the fair value of its private company investments based on the share price of the most recent financing completed by the private company. Previously, the Company used a weight average approach based on prior financings to estimate the fair value of its private company investments.

The following tables reflect the retroactive changes made to the financial statements for the three months ended March 31, 2023 giving effect to this Policy change:

20) FINANCIAL ASSETS AND LIABILITIES

Categories of financial assets and liabilities

Financial assets and liabilities measured at amortized cost for which a fair value is provided in the statement of financial position are presented in accordance with the fair value hierarchy.

This hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3: inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table illustrates the classification and hierarchy of the Company's financial instruments, measured at fair value in the statements of financial position as at March 31, 2024 and December 31, 2023.

As at March 31, 2024	**Level 1**	**Level 2**	**Level 3**	**Total**
Short-term investments	**$ 33,330**	**-**	**$ -**	**$ 33,330**
Long-term investments	**-**	**-**	**3,000,000**	**3,000,000**
	$ 33,330	**$ -**	**$ 3,000,000**	**$ 3,033,330**

As at December 31, 2023	**Level 1**	**Level 2**	**Level 3**	**Total**
Short-term investments	$ 35,085	-	$ -	$ 35,085
Long-term investments	-	-	3,000,000	3,000,000
	$ 35,085	$ -	$ 3,000,000	$ 3,035,085

(Expressed in Canadian dollars unless otherwise noted)

20) FINANCIAL ASSETS AND LIABILITIES (continued)

Categories of financial assets and liabilities (continued)

Within Level 3, the Company includes private company investments that are not quoted on an exchange. The key assumptions used in the valuation of these instruments include (but are not limited to) the value at which a recent financing was done by the investee, company-specific information, trends in general market conditions and the share performance of comparable publicly-traded companies.

The following table presents the fair value, categorized by key valuation techniques and the unobservable inputs used within Level 3 as at March 31, 2024 and December 31, 2023.

	Fair value	Valuation Technique	Significant Unobservable Input(s)
Juno Corp (note 10)	$ 3,000,000	Recent financing	Marketability of shares

As valuations of investments for which market quotations are not readily available, are inherently uncertain, may fluctuate within short periods of time and are based on estimates, determination of fair value may differ materially from the values that would have resulted if a ready market existed for the investments. Given the size of the private investment portfolio, such changes may have a significant impact on the Company's financial condition or operating results.

As at March 31, 2024, a +/- 10% change in the fair value of Juno Corp will result in a corresponding +/- $300,000 change in the carrying amount. While this illustrates the overall effect of changing the values of the unobservable inputs by a set percentage, the significance of the impact and the range of reasonably possible alternative assumptions may differ significantly between investments, given their different terms and circumstances. The sensitivity analysis is intended to reflect the significant uncertainty inherent in the valuation of private investments under current market conditions, and the results cannot be extrapolated due to non-linear effects that changes in valuation assumptions may have on the estimated fair value of these investments. Furthermore, the analysis does not indicate a probability of changes occurring and it does not necessarily represent the Company's view of expected future changes in the fair value of these investments. Any management actions that may be taken to mitigate the inherent risks are not reflected in this analysis.

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement. There have been no significant transfers between Levels 1, 2 and 3 in the reporting periods. The techniques and evaluation methods used to measure fair value were not changed compared to previous years.

The carrying value of cash and cash equivalents, accounts receivable, due from/to related parties, accounts payable and accrued liabilities is considered to be a reasonable approximation of fair value because of the short-term maturity of these instruments.

These objectives will be achieved by identifying the right exploration prospects, adding value to these projects and ultimately taking them through to production either with partners or by the Company's own means or sale. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares to improve its financial performance and flexibility. When financing conditions are not optimal, the Company may enter into option agreements or other solutions to continue its exploration and evaluation activities or may slow its activities until conditions improve. The Company monitors capital on the basis of the carrying amount of equity. Capital for reporting period under review is summarized in note 13 and in the statements of changes in equity.

21) CAPITAL MANAGEMENT POLICIES AND PROCEDURES (continued)

The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSX Venture Exchange ("TSXV") which requires adequate working capital or financial resources of the greater of (i) $50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of six months.

22) FINANCIAL RISKS

The Company is exposed to various financial risks in relation to its financial instruments. The main types of risks the Company is exposed to are credit risk, market risk and liquidity risk. The Company focuses on actively securing short to medium-term cash flow by minimizing the exposure to financial markets. The Company does not actively engage in the trading of financial instruments for speculative purposes. The Company's main financial risk exposure and its financial risk management policies are as follows:

Credit risk

Credit risk relates to the risk that one party to a financial instrument will not fulfill some or all of its obligations, thereby causing the Company to sustain a financial loss. The Company's maximum exposure to credit risk is limited to the carrying amount of cash and cash equivalents of $203,172 at March 31, 2024 (December 31, 2023 - $183,100), accounts receivable of $nil (December 31, 2023 - $482,777), due from related parties of $6,538 (December 31, 2023 - $10,348) and other receivable of $5,748 (December 31, 2023 - $5,748). The risk related to cash and cash equivalents is considered negligible as the Company is dealing with a reputable financial institution whose credit rating is excellent. The risk related to amounts due from related parties is mitigated by having common management. No risk related to accounts receivable as amounts have been received subsequent to quarter-end.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The Company is exposed to fluctuations in the market prices of its investments in private and public companies. The fair value of those instruments represents the maximum exposure to price risk.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk management serves to maintain a sufficient amount of cash and to ensure that the Company has potential financing sources. The Company establishes budget and cash estimates to ensure it has the necessary funds to fulfil its obligations. Accounts payable and accrued liabilities are due within less than 90 days.

23) SUBSEQUENT EVENT

Subsequent to the quarter end, the Company announced that, further to its news releases of May 14 and 17, 2024, it has completed a debenture financing (the "Debenture Financing") for gross proceeds of $430,000.

The Company issued 43 debenture units (the "Debenture Units") at an issue price of $10,000 per Debenture Unit. Each Debenture Unit consists of one convertible senior unsecured debenture with a principal amount of $10,000 (a "Debenture") and 70,000 detachable common share purchase warrants (each a "Warrant"). Each Warrant is exercisable for a period of 12 months from the closing of the Debenture Financing, at an exercise price per Warrant of $0.07.

The Debentures have a term of 12 months expiring on May 28, 2025, subject to early redemption and bear interest at the rate of 6%, accrued and compounded annually, which interest will be paid in cash or shares at maturity or redemption. At maturity, the Debentures will be converted into fully paid common shares of the Company, at a conversion price of $0.06. At any time prior to the maturity date, on providing the holders with 30 days' notice, the Company will have the right to redeem the Debentures, by paying the principal amount of the Debentures and any accrued and unpaid interest in cash. The accrued and unpaid interest on the Debentures can be paid by the Company on maturity in common shares of the Company at a deemed price per share equal to the Market Price (as such term is defined in TSX Venture Exchange policies) of the Company's shares at the time of such payment.

Within 30 days of a change of control of the Company (which means a change in the legal or effective control of the Company or affiliates, whether as a result of, or in connection with, a take-over bid, amalgamation, arrangement, merger, or other form of business combination, asset disposition, election of directors, or any combination of the foregoing transactions), the holders of the Debentures have the option to require the Company to repurchase its Debentures then outstanding, in cash, at a price equal to (i) 125% of the outstanding amount of the Debentures, plus; (ii) any accrued and unpaid interest, in cash.
